

# Achieve Corporate Insight Fast.

# Turbo Integrator

**Applix Turbo Integrator** empowers you to gain timely insight into business performance. It helps you manage the importation of data efficiently, so you can analyze corporate data in minutes, rather than hours, providing instant visibility. With Turbo Integrator, you can promote accountability throughout your organization by using the most current data, and gain consistency as all members act and analyze using the same data.

Loading disparate corporate data into business intelligence solutions is often a complex and time consuming process. Applix Turbo Integrator, in conjunction with Applix TM1™, streamlines this process, providing organizations with the ability to perform fast and precise data loads.

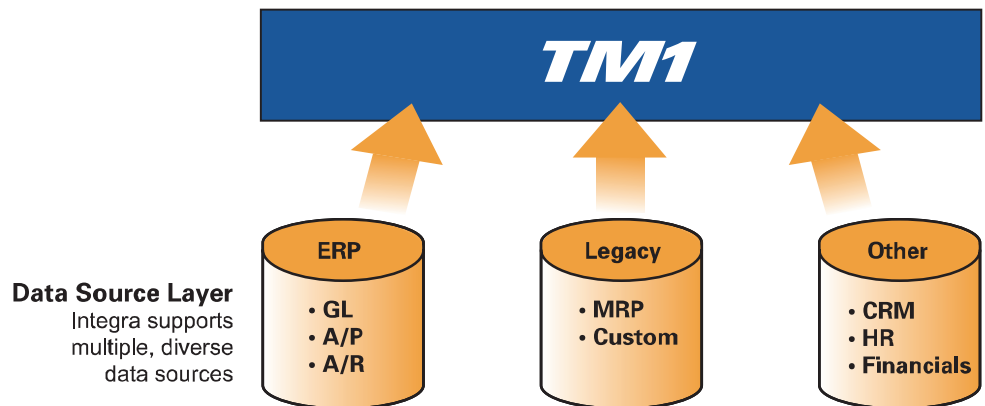

## Features and Benefits

### Gather Key Business Data from Multiple Sources

- Easily connect to any ODBC-compliant database to load data into TM1.
- Import data from ERP systems such as SAP, Oracle, PeopleSoft or from data warehouses.
- Quickly import data from your existing Excel workbooks or ASCII files from legacy systems.
- Export data into ASCII files or into any ODBC-compliant database to feed legacy systems for reconciliation purposes.

### Speed and Efficiency

- Applix Turbo Integrator processes large amounts of data quickly into your TM1 solution. It allows for frequent data loads during key business cycles without negatively impacting performance.

Integrate data from disparate sources.

### Quickly Build and Maintain Metadata and Data

To enable you to be proactive in your business environment Turbo Integrator helps you:

- Create dimensions with hierarchies, build cubes, and load data.
- Manipulate dimensions as needed to change the hierarchy, delete elements, alter element aliases.

### Easy -to-Use Interface

- The user interface accommodates the most common data and metadata tasks.

### Complex Data Manipulation

- Create custom processes that can extend beyond the user interface for tasks that involve conditional expressions or looping.

### Audit Trail of Tasks

- Every task produces a log file verifying the success of the process. If an error is generated, details are recorded in the log file.

### Schedule Common Tasks

- Schedule any task to ease the coordination of data loads and maintain your TM1 solution.
